

# Structured Product Analytics

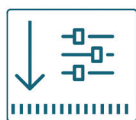

## Our Mission

To be a company that provides cutting edge solutions and fully supported services in financial valuations, systems and research. We always strive for excellence and to provide true value for our clients.

## Our Vision

To continually improve by developing our experience and expertise. We will achieve this by listening to clients, investing in our team, and observing and influencing the market around us.

## Company Services

### Structured Edge

Leading research service covering thousands of individual structured products for advisers

### Nextval

Flexible and transparent cloud based valuation service pricing, Greeks and VaR of OTC derivatives and structured products

### Structured Edge

Structured product stress testing portal and API to satisfy FCA, Consumer Duty, MiFID II, PRIIPs and FINRA regulations

### Lifecycle Solution

Flexible comprehensive and detailed lifecycle solution to provide events and monitoring on a live pipeline of structured products. Fully compatible with our stress testing system

### Portfolio and Fund Analysis

Aggregate portfolio information for our lifecycle solution. Algorithm backtesting and development, plus performance breakdowns and scenarios for structured funds

### Independent

In house expertise and proprietary models, systems and data

### Quality

All services thoroughly tested, supported and monitored to meet our clients' expectations

## Our Approach

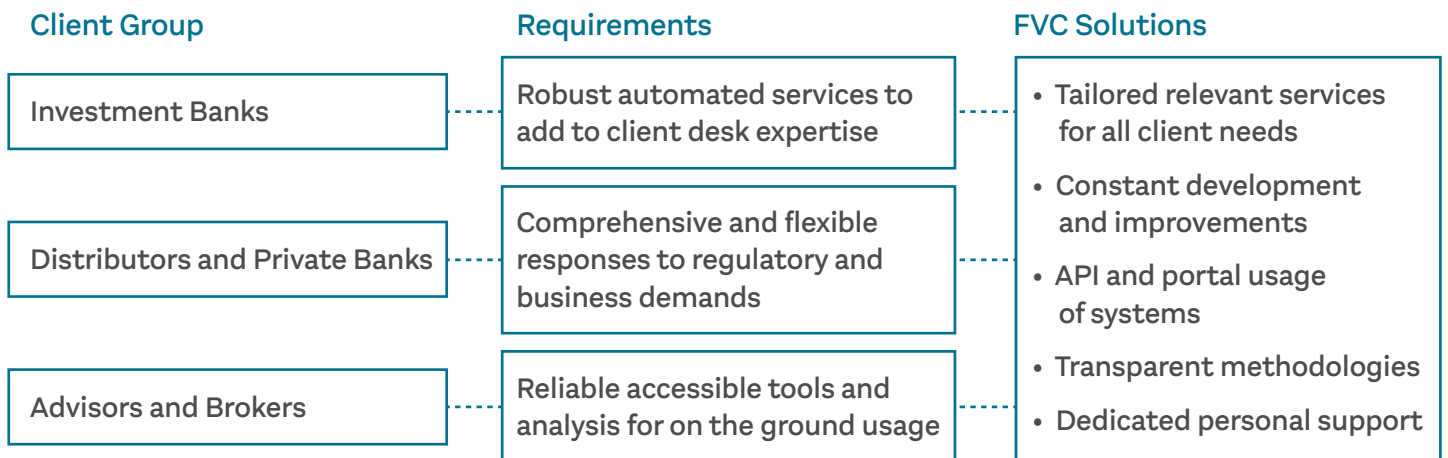

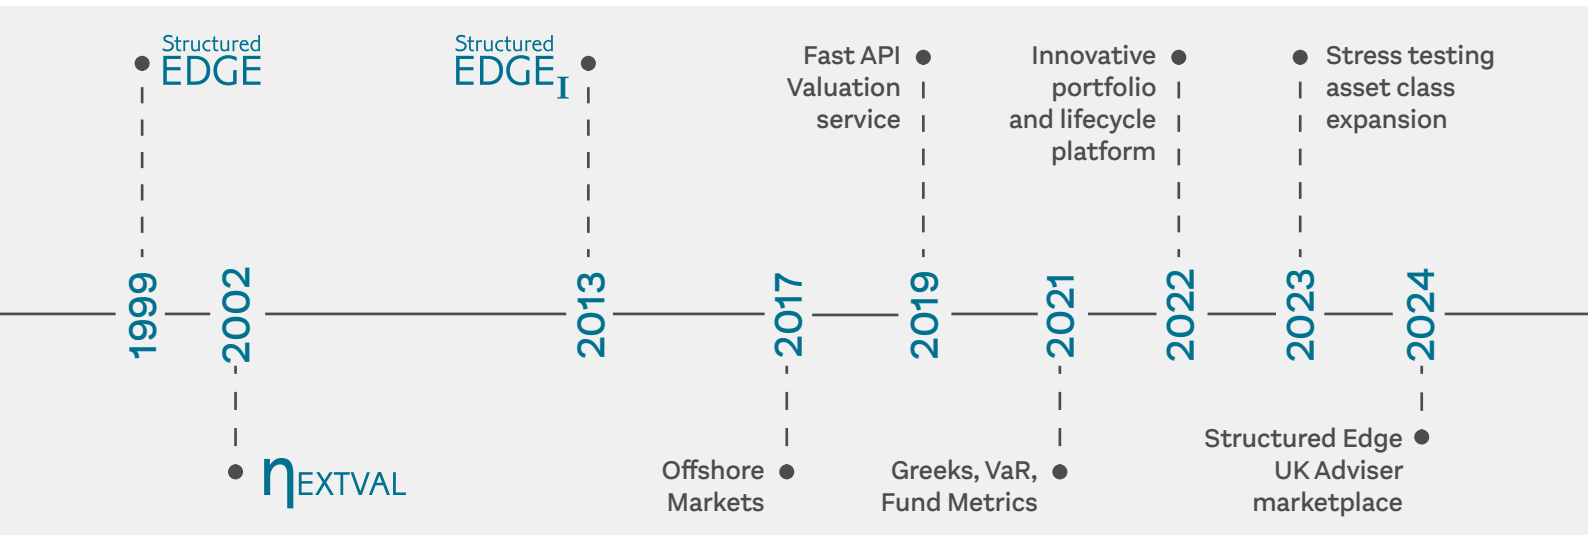

### Responsive

Collaborating with clients to anticipate demand and future enhancements

### Targeted

Solutions designed to satisfy business regulatory and compliance requirements

# Company Milestones: A decade of rapid development

## Our Team

The combination of experience, expertise, preparation and teamwork is the key to providing our clients the service they expect and the standards we set ourselves.

We have a balanced team of professionals including business experts, quantitative analysts, technology developers and marketing specialists.
